TIME MANAGEMENT SYSTEMS

DATA SHEET: KCS BELLRINGER

Automatically control your Bell or siren with our easy to use, computer-controlled KCS Bell-Ringer

The fully automatic KCS Bellringer solves the daily problem of ringing a bell or siren on time, every time, as and when required.

The KCS Bell Ringer is specially designed to automate a bell or siren.

Yes, now you can forget about your bell or siren - the KCS Bellringer together with your computer will take care of everything!

Useful features of the KCS Bellringer:

- Ring times are easy to program
- It is easy to override the system for an emergency ring
- Uncomplicated operation - your office staff may do it
- Runs from a normal PC in background mode
- Time settings are not lost when power goes down
- Ring times may be different for each day
- Management is improved
- Once time is set, no further attention is required
- Time may be changed immediately is required
- Twin outputs mean you can control a bell for periods and breaks and a siren for start and finish (or vice versa)
- Can easily run a 10 day timetable
- Stand alone PC is recommended

Set different times for each day, different periods for summer and winter. You'll **love** the KCS Bellringer!

The **KCS Bell Ringer** is designed from the ground up for siren/bell applications. An important feature is the use of a computer to set the times. The computer program is really easy to use, unlike other, more complicated predecessors.

The **KCS Bell Ringer** is available directly from us, the manufacturers.
